PROJECT DEFINITION

Zameen Dekho is a web-based application designed to provide users with an easy and efficient platform to search for properties either for sale or for rent. The primary goal of the application is to connect users with available properties based on their preferences, while offering a streamlined interface for managing property listings. Users can also add properties to their wishlist, allowing them to keep track of their favorite listings for future reference.

Key features include:

1. Property Listing.
2. User Wishlist.
3. Wishlist Management.
4. Admin Panel.

Technologies:

- Laravel
- Bootstrap
- MySQL
